# Statements of Work

Job roles from **3D Rendering** through **Visual Design**

| **15 role-specific SOWs** |
| --- |
| Each statement defines the objective, scope of services, deliverables, acceptance criteria, and assumptions or exclusions. |
| Written at a practical project-delivery level—not as generic one-line job descriptions. |

Prepared from the role list in the supplied Job_counts.pdf. The SOWs are adaptable templates; project-specific quantities, deadlines, budgets, revision limits, and ownership terms should be confirmed before use.

# Included roles

1. 3D Rendering
2. Logo Design
3. Adobe Photoshop
4. Video Post-editing
5. 3D Animation
6. Illustration
7. 3D Design
8. Photography
9. Word
10. CSS
11. Final Cut Pro
12. Audio Editing
13. Motion Graphics
14. Building Architecture
15. Visual Design

## How to use these SOWs

Before issuing an SOW, replace broad terms such as “agreed number” or “specified format” with measurable details. Confirm schedule, fee, payment milestones, revision allowance, dependencies, intellectual-property rights, confidentiality, and change-control process in the governing agreement.

# 1. 3D Rendering

## Objective

Produce polished, technically consistent still images or image sequences from supplied 3D models and scene files, suitable for the agreed presentation, marketing, or design-review purpose.

## Scope of services

- Review the brief, reference images, model files, dimensions, materials, camera requirements, target audience, and intended output format.
- Prepare or refine scene lighting, cameras, materials, textures, environment, and render settings within the agreed level of effort.
- Generate preview renders, collect consolidated feedback, and complete the agreed number of revision rounds.
- Render final images at the agreed resolution, aspect ratio, file format, and colour settings; perform basic quality checks for noise, artefacts, clipping, and missing assets.

## Deliverables

- Approved preview render(s) and final high-resolution render(s).
- Final exports in the agreed formats (for example PNG, JPG, or TIFF) and a short delivery note listing dimensions and versions.
- Source scene/project files only if explicitly included in the agreement.

## Acceptance criteria

- Final renders match the approved composition, visual direction, and supplied references to a reasonable professional standard.
- Files open correctly and meet the agreed resolution, aspect ratio, format, and naming requirements.
- Any material deviations from the brief are documented before final delivery.

## Assumptions and exclusions

Client supplies usable 3D models, reference material, and accurate specifications. Modelling missing assets, major design changes, animation, and extra views are excluded unless listed.

# 2. Logo Design

## Objective

Develop a distinctive, usable logo system that reflects the client's brand positioning and works across the agreed digital and print applications.

## Scope of services

- Review the brand brief, target audience, competitors, preferred style, usage contexts, and any existing brand assets.
- Develop a small set of concept directions and explain the rationale behind the recommended direction.
- Refine the selected concept through the agreed revision rounds, including proportion, typography, colour, spacing, and legibility adjustments.
- Prepare appropriate logo variations, such as full-colour, monochrome, reversed, and horizontal or stacked versions where relevant.

## Deliverables

- Approved primary logo and the agreed secondary variations.
- Vector master file (such as SVG, PDF, or AI, according to the agreement) plus web-ready PNG/JPG exports.
- A concise usage sheet specifying colour values, clear-space guidance, and minimum-size considerations.

## Acceptance criteria

- The approved design follows the agreed brief and is legible at the intended sizes.
- Exports are supplied in the agreed formats and variations with no missing fonts or broken links where avoidable.
- The final package contains only the agreed, approved design direction.

## Assumptions and exclusions

Client provides the correct business name and any required tagline. Trademark searches, legal clearance, naming, full brand guidelines, and additional concepts are excluded unless separately agreed.

# 3. Adobe Photoshop

## Objective

Create or edit raster-based visual assets in Adobe Photoshop to meet the agreed creative brief, technical specifications, and intended use.

## Scope of services

- Review source images, copy, reference visuals, usage rights, output sizes, and the desired visual treatment.
- Perform the agreed work, which may include compositing, retouching, colour correction, masking, background removal, image cleanup, or campaign-asset production.
- Maintain a non-destructive workflow where practical, using organised layers, masks, adjustment layers, and clearly named groups.
- Provide review proofs, apply consolidated feedback, and export final assets to the specified dimensions and formats.

## Deliverables

- Final flattened exports in agreed formats and dimensions.
- Organised layered PSD source file if included in scope.
- A delivery list noting file names, dimensions, and any important export variants.

## Acceptance criteria

- Images follow the approved brief and show no obvious unintended halos, artefacts, inconsistent colour, or unfinished areas at normal viewing size.
- Exports match the requested dimensions, colour profile where specified, and file format.
- Layered files, when included, are reasonably organised and open without missing linked assets.

## Assumptions and exclusions

Client supplies high-quality source images and has the right to use them. Extensive reconstruction, licensed stock purchases, original photography, and unrelated design work are excluded unless agreed.

# 4. Video Post-editing

## Objective

Transform supplied footage and assets into a coherent, polished edit that follows the agreed narrative, pacing, platform requirements, and brand direction.

## Scope of services

- Review footage, audio, script or outline, graphics, brand assets, target platform, duration, aspect ratio, and delivery specifications.
- Select and arrange usable footage; perform cuts, pacing adjustments, transitions, basic colour correction, audio balancing, titles, and agreed graphics.
- Identify missing, corrupt, or technically unsuitable source material and raise issues before finalisation.
- Provide a review cut, incorporate consolidated feedback, and export the approved final version(s).

## Deliverables

- Final edited video in the agreed codec/container, resolution, frame rate, and aspect ratio.
- Agreed cut-downs, captions, or platform versions if explicitly listed.
- Editable project file and collected media only if included in scope and permitted by asset licences.

## Acceptance criteria

- The edit follows the approved content order and agreed runtime range.
- Audio is intelligible and reasonably balanced; titles and graphics are readable; exports play through without obvious technical errors.
- Final files meet the agreed platform and technical specifications.

## Assumptions and exclusions

Client supplies footage, script, music, logos, and release permissions on time. Reshoots, extensive animation, translation, licensed music fees, and additional versions are excluded unless specified.

# 5. 3D Animation

## Objective

Create a 3D animated sequence that communicates the agreed action, product behaviour, or visual story with consistent motion, materials, lighting, and presentation.

## Scope of services

- Confirm the concept, sequence length, frame rate, output aspect ratio, target audience, style references, and required actions.
- Review supplied models and rigs; prepare or adjust assets only to the extent specified in the brief.
- Create a storyboard or animatic where appropriate, then develop blocking, timing, animation, camera movement, lighting, and rendering.
- Share previews at agreed checkpoints, incorporate consolidated feedback, and render the approved final sequence.

## Deliverables

- Approved animation preview or animatic, where included.
- Final rendered video sequence in the agreed resolution, frame rate, and format.
- Source project, rigs, or editable scene files only if expressly included.

## Acceptance criteria

- The sequence contains the agreed actions and follows the approved storyboard or direction.
- Motion, camera cuts, and timing are coherent, with no unintended visible clipping or missing frames in the final export.
- The export meets the agreed technical specifications and duration.

## Assumptions and exclusions

The estimate depends on model readiness, rig complexity, duration, and render requirements. New characters/assets, simulation-heavy effects, voice-over, and major storyboard changes are excluded unless listed.

# 6. Illustration

## Objective

Create original or adapted illustrations that communicate the agreed subject, tone, and visual message for the specified audience and applications.

## Scope of services

- Confirm the purpose, audience, art direction, subject matter, style references, dimensions, and intended usage rights.
- Develop sketches or composition options where appropriate and obtain direction approval before detailed execution.
- Create the illustration using the agreed medium or workflow, refining composition, colour, line work, detail, and hierarchy.
- Apply the agreed revision rounds and prepare final exports for the specified channels.

## Deliverables

- Final illustration(s) in the agreed size and formats.
- Print-ready or digital-ready exports as required by the brief.
- Editable source file only if included in the agreement.

## Acceptance criteria

- The illustration matches the approved concept and includes the agreed subjects and key details.
- The composition remains legible at the intended display size.
- Files meet the agreed resolution, colour mode, and format requirements.

## Assumptions and exclusions

Client provides accurate factual references and confirms any required likenesses or permissions. Additional characters, alternate concepts, extensive revisions, and exclusive licensing are excluded unless agreed.

# 7. 3D Design

## Objective

Develop a three-dimensional design concept or asset that meets the agreed functional, aesthetic, dimensional, and presentation requirements.

## Scope of services

- Review the design brief, reference material, intended use, constraints, approximate dimensions, materials, and required outputs.
- Create or refine the 3D concept and geometry to the agreed level of detail, checking proportions and key design features.
- Present views or previews for review, document material assumptions, and incorporate approved revisions.
- Prepare final model and presentation outputs in the agreed formats and level of editability.

## Deliverables

- Final 3D model or design file in the agreed native or interchange format.
- Presentation views or screenshots, if included.
- A brief handover note covering units, scale, file format, and known limitations.

## Acceptance criteria

- The model reflects the approved design intent and supplied dimensional constraints.
- Geometry and files are usable for the agreed downstream purpose to the extent specified.
- The handover includes the agreed views and file formats.

## Assumptions and exclusions

This scope is for design development, not automatically for manufacturing certification. Engineering validation, physical prototyping, production drawings, and structural analysis are excluded unless specified.

# 8. Photography

## Objective

Plan and produce a set of photographs that meets the agreed creative brief, subject coverage, technical requirements, and intended usage.

## Scope of services

- Confirm the shot list, subjects, location, schedule, styling needs, usage channels, and any access or safety constraints.
- Prepare a practical shoot plan covering equipment, lighting, composition, and required variations.
- Capture the agreed shots and perform selection, basic colour correction, exposure balancing, cropping, and agreed retouching.
- Deliver a curated final selection and communicate any gaps caused by unavailable subjects, locations, or props.

## Deliverables

- Agreed number of edited, high-resolution photographs in the specified format.
- Web-sized or other alternate exports if listed in the brief.
- Contact sheet or selection gallery where agreed.

## Acceptance criteria

- The final set covers the approved shot list to the extent possible under the agreed conditions.
- Images are in focus where intended, consistently processed, and free of obvious unintended editing artefacts.
- Files meet the agreed size, format, and delivery requirements.

## Assumptions and exclusions

Location access, subjects, products, props, permits, and releases are supplied or arranged as agreed. Travel, studio hire, models, specialist equipment, and extensive retouching are additional unless stated.

# 9. Word

## Objective

Create, format, or revise a Microsoft Word document that is structured, readable, consistent, and suitable for its intended business, academic, or operational use.

## Scope of services

- Review the supplied content, template, style guide, document purpose, audience, and required page or formatting constraints.
- Apply consistent headings, styles, page layout, numbering, tables, headers/footers, captions, and cross-references as required.
- Correct agreed formatting inconsistencies and implement document navigation features such as an automatic table of contents where appropriate.
- Check pagination, section breaks, table placement, and export behaviour before delivery.

## Deliverables

- Editable DOCX file with consistent formatting and styles.
- PDF export if requested.
- A brief note listing any missing content, unresolved references, or formatting limitations.

## Acceptance criteria

- The document follows the agreed structure and formatting specifications.
- Headings, page numbers, tables, and other navigational elements display consistently.
- The file opens in a compatible word processor and the supplied PDF, if any, matches the approved version.

## Assumptions and exclusions

Unless editing is explicitly included, the client is responsible for the factual accuracy and completeness of the content. Research, substantive rewriting, translation, and specialist proofreading are excluded unless agreed.

# 10. CSS

## Objective

Implement or refine responsive styling for the agreed web pages or components while maintaining visual consistency, accessibility, and compatibility with the existing front-end structure.

## Scope of services

- Review the existing HTML/component structure, design references, breakpoints, supported browsers, and styling conventions.
- Implement layout, typography, colour, spacing, states, responsive behaviour, and component styling within the agreed pages or components.
- Use maintainable selectors and reusable styles where practical, avoiding unnecessary duplication or broad rules that disrupt unrelated pages.
- Test agreed viewport sizes and browser targets; resolve styling defects introduced by the delivered changes.

## Deliverables

- Updated CSS or styling files and any agreed component-level changes.
- Before/after screenshots or a preview link where available.
- A short handover note identifying changed files and any known browser limitations.

## Acceptance criteria

- Specified components match the approved visual reference within reasonable implementation tolerances.
- Layouts remain usable at agreed desktop, tablet, and mobile widths.
- No known critical styling regressions occur in the agreed test pages and browsers.

## Assumptions and exclusions

Client supplies access to the codebase and a runnable development environment. Backend changes, new application functionality, full redesign, and support for unspecified browsers are excluded unless agreed.

# 11. Final Cut Pro

## Objective

Edit and finish video content in Final Cut Pro according to the agreed narrative, brand style, and technical delivery requirements.

## Scope of services

- Organise supplied media, confirm project settings, and review the edit brief, script, audio, graphics, and reference material.
- Build the timeline, refine cuts and pacing, apply agreed transitions, titles, colour adjustments, and audio balancing.
- Manage review versions and incorporate consolidated feedback within the agreed revision allowance.
- Export final masters and any specified platform versions; verify playback and basic technical properties.

## Deliverables

- Final video export(s) in the agreed resolution, frame rate, codec, and aspect ratio.
- Final Cut Pro library/project and media handover only if expressly included.
- A delivery summary listing versions and export settings.

## Acceptance criteria

- The edit follows the approved structure and runtime requirements.
- Titles, transitions, image and sound levels are consistent with the agreed style.
- Exports play correctly and meet the agreed technical specifications.

## Assumptions and exclusions

All source footage and licensed assets are provided or separately budgeted. Advanced motion design, extensive sound restoration, reshoots, and new language versions are excluded unless listed.

# 12. Audio Editing

## Objective

Edit and prepare supplied audio so that it is clear, coherent, appropriately balanced, and technically suitable for the intended platform or production.

## Scope of services

- Review source recordings, desired runtime, delivery platform, loudness requirements, and any reference audio.
- Remove agreed unwanted sections, organise takes, reduce manageable background noise, balance levels, and apply appropriate fades or transitions.
- Perform basic equalisation, compression, de-essing, or other processing as appropriate to the material and brief.
- Provide a review file, apply consolidated feedback, and export final audio in the specified formats.

## Deliverables

- Final audio master in the agreed format, sample rate, bit depth, and channel layout.
- Alternate versions or stems if expressly included.
- Edited session/project files only if included in scope.

## Acceptance criteria

- Speech or intended foreground audio is intelligible and reasonably consistent in level.
- Edits contain no unintended cuts, clicks, or abrupt transitions that are reasonably avoidable from the source material.
- Exports meet the agreed technical specifications and play correctly.

## Assumptions and exclusions

Results depend on source recording quality. Re-recording, voice casting, music licensing, full composition, and removal of severe noise or distortion that cannot reasonably be repaired are excluded unless agreed.

# 13. Motion Graphics

## Objective

Create animated graphic content that communicates the agreed message or brand story through clear visual hierarchy, purposeful movement, and consistent design.

## Scope of services

- Confirm the message, script, duration, platform, aspect ratio, brand assets, visual references, and delivery specifications.
- Develop a storyboard or style frames where appropriate and obtain approval before full animation.
- Animate typography, shapes, icons, charts, transitions, and other agreed graphic elements; synchronise movement to supplied audio where required.
- Share previews at agreed checkpoints, apply consolidated revisions, and render final outputs.

## Deliverables

- Approved style frames or storyboard if included.
- Final motion-graphics video in the agreed format, resolution, frame rate, and aspect ratio.
- Editable project files and asset package only if included.

## Acceptance criteria

- Animation follows the approved storyboard, visual style, timing, and message.
- Text remains readable and motion does not obscure essential information.
- Final exports meet the technical requirements and contain no obvious rendering errors.

## Assumptions and exclusions

Client supplies approved copy, logos, brand guidelines, and licensed audio. Scriptwriting, voice-over, complex 3D scenes, localisation, and extra aspect-ratio versions are excluded unless specified.

# 14. Building Architecture

## Objective

Prepare architectural design or documentation outputs for the agreed building area and project stage, based on the supplied brief, site information, and applicable constraints.

## Scope of services

- Review the brief, site measurements, existing drawings, room or space requirements, reference styles, and required submission or presentation format.
- Develop the agreed concept plans, layouts, elevations, sections, or visualisations to the specified level of detail.
- Coordinate revisions against client feedback and document key assumptions or unresolved design inputs.
- Prepare and quality-check the final drawing or presentation package using the agreed scale, units, sheet sizes, and file formats.

## Deliverables

- The agreed architectural drawings, layouts, or concept presentation package.
- PDF sheets and editable CAD/BIM files only as specified in the agreement.
- A note identifying assumptions, information still required, and the project stage represented by the drawings.

## Acceptance criteria

- Deliverables cover the agreed spaces and drawing types and reflect the approved design direction.
- Dimensions, labels, sheet references, units, and scales are consistent to the extent supported by the supplied information.
- Files are readable and delivered in the agreed formats.

## Assumptions and exclusions

The scope must identify whether work is conceptual, design-development, or construction documentation. Site surveys, structural/MEP engineering, code certification, permits, and professional sign-off are excluded unless separately contracted and performed by appropriately qualified professionals.

# 15. Visual Design

## Objective

Develop a coherent visual system or set of visual assets that communicates the intended message and supports the agreed user, brand, or campaign goals.

## Scope of services

- Review the brief, audience, channel, brand guidelines, existing assets, references, and success criteria.
- Establish visual hierarchy, typography, colour, spacing, imagery, and layout principles suited to the intended context.
- Create the agreed designs, such as campaign assets, presentation visuals, interface mock-ups, or supporting graphic layouts.
- Present work for review, apply consolidated feedback, and prepare final exports and source files according to the agreement.

## Deliverables

- Approved visual designs in the agreed quantity, dimensions, and formats.
- Exported assets optimised for the specified digital or print use.
- Editable source files and a concise style or handover note if included.

## Acceptance criteria

- Designs follow the approved brief and brand direction, with clear hierarchy and consistent visual treatment.
- Assets meet the agreed technical specifications and are legible in their intended context.
- The final handover contains the agreed versions and formats.

## Assumptions and exclusions

The client supplies approved content and brand assets. Full brand strategy, user research, copywriting, development/implementation, print production, and additional campaign variants are excluded unless agreed.
