Statements of Work: Freelance Job Profiles

Oct 17, 2026 · @krishna

How to use these SOWs

These 17 sample statements of work are the "original scope" baselines for the C35 Scope Change Desk. Each one lists deliverables, inclusions, explicit exclusions, revision limits and hour estimates, plus common change requests with their correct classification. All projects, prices and clients are synthetic examples, not real engagements.

Every SOW follows the same structure: engagement summary, deliverables with hours, included, excluded, revisions and acceptance, client responsibilities and assumptions, and a change request bank.

Rate card (illustrative, INR per hour, before GST)

Profile	Rate (₹/hr)	Typical studio size
Graphic Design	1,000	3–10
Logo Design	1,200	2–8
Photoshop retouching	800	2–6
Illustrator vector illustration	1,200	2–6
Website Design	1,200	3–15
eCommerce build	1,000	4–15
API Integration	1,500	3–10
MySQL database	1,400	2–8
Data Collection	500	3–20
Link Building	700	3–12
Video Editing	900	2–10
Video Production	1,200 + crew day rates	5–20
Video Services (social)	900	3–10
After Effects motion graphics	1,200	2–8
2D Animation	1,200	3–12

Profile	Rate (₹/hr)	Typical studio size
3D Modelling	1,300	2–8
3D Rendering	1,300	2–8

The case fixture uses ₹1,000/hr, so its scored check works the same with these SOWs: 6 extra hours × ₹1,000 = ₹6,000 before tax.

Global terms that apply to every SOW

- **Change rule:** any work not listed under Deliverables is a change request. It is estimated, priced and needs written approval before work starts. Rejected or pending changes are never scheduled.
- **Revision vs change:** a revision adjusts an agreed deliverable within its brief. A change adds a deliverable, alters the brief, or exceeds the included revision rounds.
- **Defect vs change:** an error caused by the studio (typo it introduced, wrong spec, broken link it created) is fixed free. It still consumes team capacity and is logged as warranty work.
- **Unclear requests:** a request with no measurable outcome ("make it pop", "make it better") gets clarifying questions, not an estimate.
- **Rush work:** delivery inside 48 hours of request adds 1.5× to the change's hours-based price.
- **Approver:** one named client approver per project. An approval applies only to the version it references; a newer version needs fresh approval.
- **Tax:** prices exclude GST. Registered studios add 18% for Indian clients; exports are zero-rated.
- **Disclaimer:** these are workflow templates, not legal contracts or legal advice.

1. Graphic Design: festive campaign creative pack

Engagement: a D2C apparel brand needs a Diwali campaign kit. Budget is 40 hours × ₹1,000 = **₹40,000** over 10 working days.

#	Deliverable	Specification	Hours
1	Key visual	1 master campaign artwork, 2 initial concepts	10
2	Instagram posts	6 static posts, 1080×1350 px	9
3	Instagram stories	4 stories, 1080×1920 px	5

#	Deliverable	Specification	Hours
4	Web banners	3 sizes: 1920×600, 1200×628, 728×90	6
5	Email header	1 header, 600 px wide	2
6	Print flyer	1 A5 flyer, single-sided, CMYK print-ready PDF	4
7	Revisions and file prep	2 rounds, final exports	4
	Total		**40**

Included

- Layout, typography and colour using the client's existing brand guide
- Licensed stock images from the studio's subscription, up to 10 images
- Final files: PNG/JPG for digital, PDF for print, layered PSD/AI source files

Excluded

- Copywriting and Hindi or regional translations
- Photoshoots, custom illustrations, animation or video
- Logo or brand identity changes
- Ad account setup, posting or media buying
- Additional sizes or formats beyond the list above
- Premium stock (Getty, Shutterstock Premium) and font licences

Revisions and acceptance

- 2 revision rounds per deliverable; each round is one consolidated list of feedback
- Feedback is due within 2 working days, or the timeline shifts by the delay
- A deliverable is accepted when approved in writing or after 3 working days without feedback

Client responsibilities and assumptions

- Client provides final copy, offer details, logo files and brand guide on day 1
- One named approver: the brand marketing head
- Concept direction is locked after the key visual is approved

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add 4 more Instagram posts in the same style"	New work	6	6,000
"Resize everything for a WhatsApp catalogue too"	New work	3	3,000
"Can you write the captions as well?"	Explicit exclusion	4	4,000
"The discount on the flyer is wrong; you typed 30%, we sent 40%"	Defect (studio error)	1	0
"Change the whole concept, our founder wants gold not red"	Change after lock	8	8,000
"Make it pop more"	Unclear: ask which pieces, and what outcome	—	—
"Need 3 extra posts by tomorrow morning"	New work + rush 1.5×	4.5	6,750

2. Logo Design: brand mark for a new café

Engagement: a Hyderabad café chain launching its first outlet needs a logo. Budget is 30 hours × ₹1,200 = **₹36,000** over 3 weeks.

#	Deliverable	Specification	Hours
1	Discovery	1 brief call (45 min), questionnaire, moodboard of 2 directions	4
2	Initial concepts	3 distinct logo concepts in black and white	10
3	Refinement	Chosen concept developed in colour, 2 colour options	6
4	Logo variations	Primary, horizontal lockup, icon-only, monochrome	4
5	Mini brand sheet	1-page PDF: colours (HEX/RGB/CMYK), fonts, clear space, minimum size	3
6	Revisions and export	2 rounds; SVG, AI, EPS, PDF, PNG (transparent), favicon 32 px	3

#	Deliverable	Specification	Hours
	Total		**30**

Included

- Full ownership of the final chosen logo transferred on full payment
- Fonts limited to free commercial-use fonts (Google Fonts)
- Mockups of the logo on a cup and a signboard, 2 images

Excluded

- Trademark search or registration (refer to a trademark attorney)
- Full brand guidelines book, stationery, menu design, packaging
- Signage fabrication drawings or vendor coordination
- Additional concepts after concept selection
- Paid font licences
- Animated logo

Revisions and acceptance

- 2 revision rounds on the refined concept only
- Once a concept is chosen, the other 2 concepts are retired and not developed
- Final files delivered within 2 working days of written approval

Client responsibilities and assumptions

- Café name is final before concepts start; a name change restarts the project as a change request
- One approver: the founder
- Client completes the questionnaire within 3 working days

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Can we see 2 more concepts?"	New work	6	7,200
"Design the menu card using the new logo"	Explicit exclusion	8	9,600
"Also design business cards and letterhead"	Explicit exclusion	5	6,000

Client request	Classification	Est. hours	Price (₹)
"The HEX code in the brand sheet doesn't match the logo file"	Defect (studio error)	0.5	0
"We renamed the café, please update the logo"	Change to locked input	8	9,600
"My partner prefers concept 1, I prefer concept 3"	Conflicting approvals: founder decides	—	—
"Can you check if this logo is trademarked?"	Out of scope: refer to attorney	—	—

3. Photoshop: product photo editing and retouching

Engagement: a jewellery brand needs 60 catalogue photos edited for its website and marketplaces. Budget is 30 hours × ₹800 = **₹24,000** over 5 working days.

#	Deliverable	Specification	Hours
1	Background removal	60 images, pure white (#FFFFFF) background, clipping path	10
2	Basic retouch	Dust, scratch and reflection cleanup; colour correction to match the physical product	12
3	Standard crops	2 crops per image: 2000×2000 px (marketplace), 1600×2000 px (website)	4
4	Shadow	Natural drop shadow, consistent across the set	2
5	QC and export	JPG (sRGB, under 500 KB) + layered PSD per image	2
	Total	60 images	**30**

Included

- Up to 30 minutes of work per image on average
- 1 revision round per image
- Consistent naming: SKU_view_size.jpg

Excluded

- Photography, reshoots or styling
- Model or skin retouching, body reshaping

- Compositing, lifestyle scenes or AI-generated backgrounds
- Images beyond 60, or images supplied after day 2
- Marketplace listing uploads
- Jewellery stone recolouring that changes how the product looks (misrepresentation risk)

Revisions and acceptance

- 1 revision round; feedback must list image file names
- Colour is matched to the reference photos supplied, not to screens that are not colour-calibrated
- Batch is accepted after written approval or 3 working days without feedback

Client responsibilities and assumptions

- RAW or high-resolution JPG originals, minimum 3000 px on the longest side
- A reference photo of each product under daylight, for colour accuracy
- One approver: the catalogue manager

Change request bank

Client request	Classification	Est. hours	Price (₹)
"We have 20 more SKUs"	New work	10	8,000
"Also give us Amazon A+ content banners"	New work (design)	6	4,800
"Put the necklaces on a model photo"	Explicit exclusion (compositing)	8	6,400
"Image SKU-114 still has dust spots"	Defect (studio error)	0.25	0
"The photos are blurry, fix them"	Not fixable: source issue, recommend reshoot	—	—
"Make the gold look more yellow than it is"	Decline: misrepresents product	—	—

4. Illustrator: vector illustration set for an app

Engagement: an edtech startup needs a consistent illustration set for app onboarding and empty states. Budget is 36 hours × ₹1,200 = **₹43,200** over 2 weeks.

#	Deliverable	Specification	Hours
1	Style exploration	2 style frames (flat vs. textured), 1 chosen	6
2	Character design	1 mascot, front view + 3 poses	8
3	Onboarding illustrations	4 scene illustrations, 1200×900 px artboards	12
4	Empty-state spots	6 small spot illustrations	6
5	Revisions and export	2 rounds; SVG (optimised), PNG @1x/2x/3x, AI source	4
	Total		**36**

Included

- Colour palette limited to the app's existing 6 brand colours
- Illustrations delivered as separate, named layers ready for developers
- Commercial usage rights within the client's app and marketing

Excluded

- Animation, Lottie or motion files
- Additional mascot poses, expressions or turnarounds
- Icon set design
- Print-size artwork or merchandise files
- UI screen design

Revisions and acceptance

- 2 rounds per illustration; the style is locked after deliverable 1
- A style change after lock is treated as a change request covering all affected pieces

Client responsibilities and assumptions

- Client provides screen wireframes showing where each illustration sits, with dimensions
- One approver: the product designer

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Can the mascot wave and blink? Make it a Lottie"	Explicit exclusion (animation)	10	12,000
"Add 3 more empty-state spots"	New work	3	3,600
"We need 5 more mascot expressions"	Explicit exclusion	5	6,000
"Switch the whole set to a 3D-looking style"	Change after style lock	20	24,000
"SVG for scene 2 renders with a broken gradient on Android"	Defect (studio export error)	1	0
"Make it more fun for kids"	Unclear: ask for references and target age	—	—

5. Website Design: 5-page business website (design + WordPress build)

Engagement: an interior design firm needs a portfolio website. Budget is 60 hours × ₹1,200 = **₹72,000** over 4 weeks.

#	Deliverable	Specification	Hours
1	Sitemap and wireframes	5 pages: Home, About, Services, Portfolio, Contact	6
2	UI design (Figma)	Desktop + mobile for 5 pages, 1 style direction	16
3	WordPress build	Theme setup, responsive templates for 5 pages	22
4	Portfolio gallery	1 filterable gallery, up to 30 projects uploaded	4
5	Contact form	1 form (name, email, phone, message) to 1 email address	2
6	Basic on-page SEO	Titles, meta descriptions, alt text, sitemap.xml	3
7	QA and launch	Chrome, Safari, Android, iOS; go-live on client hosting	4
8	Handover	30-minute training call + 1 written guide	3

#	Deliverable	Specification	Hours
	Total		**60**

Included

- 2 revision rounds on design; 1 round of fixes after build
- 30 days of post-launch bug fixes (studio defects only)
- Free plugins only; Google Maps embed on Contact

Excluded

- Copywriting, photography, logo design
- Blog setup, e-commerce, payments, bookings, login/member areas
- Multilingual pages
- Hosting, domain and email purchase; ongoing maintenance
- Ongoing SEO, Google Ads, social media
- Content migration from an old site beyond 30 portfolio items
- Premium plugins or themes

Revisions and acceptance

- Design is locked after written approval of the Figma files; layout changes after lock are change requests
- Launch acceptance: client sign-off on the staging site checklist

Client responsibilities and assumptions

- Final text and images for all pages before build starts (day 10)
- Hosting with PHP 8+ and admin access
- One approver: the firm's managing partner

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add a Blog page"	Explicit exclusion	6	7,200
"Add a 'Careers' page with a job application form"	New work	5	6,000
"Make the site Hindi and English"	Explicit exclusion	14	16,800
"Add a WhatsApp chat button"	New work (small)	1	1,200

Client request	Classification	Est. hours	Price (₹)
"Contact form emails are not arriving" (within 30 days)	Defect (studio)	2	0
"Contact form stopped working after we installed a plugin"	Client-caused: billable fix	2	2,400
"Move the hero image to the right on all pages" (after lock)	Change after lock	3	3,600
"Go-live needs to be this Friday, not in 2 weeks"	Rush: capacity check, then 1.5× on remaining hours	—	—

6. eCommerce: D2C online store setup

Engagement: a skincare brand needs an online store on a hosted commerce platform. Budget is 80 hours × ₹1,000 = **₹80,000** over 5 weeks.

#	Deliverable	Specification	Hours
1	Store setup	Platform configuration, theme install, domain connection	6
2	Theme customisation	Home, collection, product, cart, about, contact pages; brand colours and fonts	24
3	Product upload	Up to 50 SKUs with up to 3 variants each, from client CSV	10
4	Payments	1 Indian payment gateway (UPI, cards, netbanking) + COD	6
5	Shipping	1 shipping aggregator integration, 3 zone-based rate rules	8
6	Taxes and invoices	GST settings, HSN codes from client, GST invoice template	4
7	Store policies	Install client-supplied refund, shipping and privacy policy pages	2
8	Analytics	Google Analytics 4 + Meta Pixel with purchase events	4

#	Deliverable	Specification	Hours
9	QA and launch	10 test orders across payment methods, mobile testing	10
10	Handover	Order-processing training (60 min) + written SOP	6
	Total		**80**

Included

- 2 revision rounds on theme design
- 30 days of post-launch fixes for studio defects
- Up to 4 free or client-paid apps installed and configured

Excluded

- Product photography, product descriptions, policy writing (legal text)
- Marketplace listings (Amazon, Flipkart, Nykaa)
- Custom app development, ERP or inventory system sync
- Subscriptions, loyalty points, gift cards, multi-currency
- Performance marketing, SEO campaigns, email automation flows
- Data migration from an existing store
- Platform, app and gateway fees (paid by client)

Revisions and acceptance

- Launch acceptance = 10 successful test orders and client sign-off
- Changes after launch outside the 30-day defect window are billable

Client responsibilities and assumptions

- Product CSV in the studio's template, with HSN codes, prices and weights, by day 7
- Payment gateway KYC completed by the client by day 14; gateway delays shift the launch
- One approver: the brand founder

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add 6 more hours of homepage customisation for the Diwali sale"	New work	6	6,000
"We have 40 more products"	New work	8	8,000

Client request	Classification	Est. hours	Price (₹)
"List our products on Amazon too"	Explicit exclusion	16	16,000
"Add a subscribe-and-save option"	Explicit exclusion	12	12,000
"Write all the product descriptions"	Explicit exclusion	15	15,000
"COD orders are charging GST twice"	Defect (studio config error)	2	0
"Sale goes live in 2 days, need a countdown banner"	New work + rush 1.5×	3	3,000
"Same request imported twice from email and WhatsApp"	Duplicate: ignore second copy	0	0

The first row matches the case fixture's scored check: 6 hours × ₹1,000 = ₹6,000 before tax.

7. API Integration: store to shipping and WhatsApp notifications

Engagement: an online store needs orders pushed to a shipping aggregator and order-status messages sent on WhatsApp. Budget is 40 hours × ₹1,500 = **₹60,000** over 3 weeks.

#	Deliverable	Specification	Hours
1	Technical spec	Data mapping document: order fields to shipping API fields; 1 review call	4
2	Order sync	New paid orders create shipments via the aggregator's REST API within 5 minutes	10
3	Status webhooks	Receive 4 events: picked up, in transit, delivered, RTO; update store order status	8
4	WhatsApp messages	3 approved templates: order confirmed, shipped (with tracking link), delivered	7
5	Error handling	Retries (3 attempts), failure log, daily email of failed syncs	5
6	Testing	Sandbox tests for 20 scenarios, then 5 live orders	4
7	Docs and handover	README, environment variables list, runbook for common errors	2

#	Deliverable	Specification	Hours
	Total		**40**

Included

- 1 store, 1 shipping aggregator, 1 WhatsApp Business API provider
- Idempotent order sync: the same order ID never creates 2 shipments
- 30 days of defect fixes after go-live

Excluded

- Additional events, carriers, marketplaces or SMS/email channels
- WhatsApp marketing campaigns or chatbot flows
- Changes needed because a third-party API changes its version after go-live
- Hosting costs, API usage fees, WhatsApp message charges
- Returns/exchange portal
- Ongoing monitoring or on-call support

Revisions and acceptance

- Spec is signed off before build; new fields after sign-off are change requests
- Acceptance = 20 sandbox scenarios pass and 5 live orders flow end to end

Client responsibilities and assumptions

- API keys and sandbox access for all 3 systems by day 3
- WhatsApp templates are approved by Meta before day 10; rejection delays are outside the studio's control
- One approver: the operations head

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Also send an 'out for delivery' message"	New work (1 event + 1 template)	3	4,500
"Add SMS as a fallback when WhatsApp fails"	Explicit exclusion	8	12,000
"Connect our second warehouse's carrier too"	Explicit exclusion	12	18,000
"Some orders created 2 shipments"	Defect (idempotency bug)	3	0

Client request	Classification	Est. hours	Price (₹)
"The aggregator moved to API v3, update everything"	Explicit exclusion (third-party change)	10	15,000
"Make the integration faster"	Unclear: ask for target latency in minutes	—	—

8. MySQL: database optimisation and reporting views

Engagement: a logistics SaaS has slow dashboards on a MySQL 8 database. Budget is 32 hours × ₹1,400 = **₹44,800** over 2 weeks.

#	Deliverable	Specification	Hours
1	Audit	Slow query log analysis; top 15 slowest queries ranked by total time	6
2	Query optimisation	Rewrite or index the top 10 queries; target: each under 500 ms on production-size data	12
3	Index plan	Add or remove indexes on up to 8 tables, with before/after EXPLAIN plans	4
4	Reporting views	3 SQL views: daily shipments, delayed shipments, revenue by client	5
5	Backup check	Verify the daily backup restores successfully on a staging copy	3
6	Report	Findings, changes made, before/after timings, rollback scripts	2
	Total		**32**

Included

- All changes tested on staging first, applied to production in 1 agreed maintenance window
- Rollback script for every schema change

Excluded

- Application code changes (ORM, API endpoints)
- Migration to another database (PostgreSQL, cloud-managed services)

- Replication, sharding or high-availability setup
- Dashboard/BI tool building (Metabase, Power BI)
- Data cleanup or deduplication of records
- Ongoing DBA support or monitoring

Revisions and acceptance

- Acceptance = top 10 queries meet the 500 ms target on staging, or a documented reason why not
- Targets assume the hardware stays as is

Client responsibilities and assumptions

- Read-only production access + full staging access with a recent data copy by day 2
- Production change window of 2 hours approved by the client
- One approver: the CTO

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Optimise the next 10 queries too"	New work	10	14,000
"Build these views into a Metabase dashboard"	Explicit exclusion	8	11,200
"Set up a read replica for reports"	Explicit exclusion	12	16,800
"The new index broke the nightly import job"	Defect (studio change)	3	0
"Remove duplicate customer records"	Explicit exclusion (data cleanup)	6	8,400
"The app is still slow"	Unclear: ask which screens and timings	—	—

9. Data Collection: B2B lead list research

Engagement: a B2B SaaS company needs a researched list of 1,000 target companies. Budget is 60 hours × ₹500 = **₹30,000** over 2 weeks.

#	Deliverable	Specification	Hours
1	Criteria sheet	Agreed filters: D2C brands in India, 10–200 employees, own website	2
2	Company research	1,000 companies: name, website, city, category, employee range, LinkedIn URL	40
3	Contact field	1 publicly listed business email or contact page URL per company	12
4	QA	Random 10% sample re-checked; target accuracy 95%	4
5	Delivery	1 CSV/Google Sheet with a data dictionary	2
	Total	1,000 rows	**60**

Included

- Only publicly available business information
- Duplicate removal by website domain
- Replacement of rows that fail QA, up to 5% of the list

Excluded

- Personal phone numbers or personal emails of individuals
- Bought or scraped contact databases
- Email verification tools and their fees
- CRM upload or outreach campaigns
- More than 1 contact per company
- Rows or fields beyond the criteria sheet

Revisions and acceptance

- Acceptance = sample accuracy of 95% or more on the agreed fields
- Criteria changes after day 2 apply only to rows not yet researched

Client responsibilities and assumptions

- Client confirms criteria and an exclusion list (existing customers) by day 1
- Data use must follow India's DPDP Act and anti-spam rules; the client is responsible for outreach compliance
- One approver: the growth manager

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add 500 more companies"	New work	30	15,000
"Add the founder's name for each company"	New field	10	5,000
"Get the founders' personal mobile numbers"	Decline: privacy risk	—	—
"Upload the list into our HubSpot"	Explicit exclusion	3	1,500
"30 rows have dead websites"	Defect (QA failure): replace free	2	0
"Actually we want companies in the UAE, not India"	Change in criteria: remaining rows only	—	Re-estimate

10. Link Building: 3-month outreach campaign

Engagement: a home-decor brand wants backlinks to its product category pages. Budget is 30 hours per month × ₹700 = **₹21,000 per month** for 3 months (₹63,000 total).

#	Deliverable (per month)	Specification	Hours
1	Prospect list	80 relevant Indian lifestyle/home sites, domain rating 20+, real traffic	8
2	Outreach	Personalised pitches to 80 prospects, 2 follow-ups each	12
3	Guest content coordination	Brief and edit up to 4 guest articles (client supplies or approves writers)	6
4	Reporting	Monthly sheet: live links, anchor text, domain rating, target URL	4
	Total per month	Target: 8 live do-follow links (best effort)	**30**

Included

- White-hat outreach only; no private blog networks or link farms
- Anchor text mix agreed with the client (brand, partial match, generic)
- Replacement of any link removed within 60 days of going live

Excluded

- Guaranteed rankings or traffic numbers
- Paid placement fees charged by publishers (passed through at cost, only with prior approval)
- Writing full articles (only briefs and edits are included)
- Technical SEO audits, on-page SEO, content strategy
- Links to pages outside the 5 agreed target URLs

Revisions and acceptance

- Each link counts once it is live, indexed and points to an agreed target URL
- The 8-link target is a goal, not a guarantee; under-delivery carries 10 hours of extra outreach into the next month at no cost

Client responsibilities and assumptions

- Client approves the prospect list within 3 working days each month
- One approver: the SEO/marketing lead

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Write the guest posts too"	Explicit exclusion	4 per article	2,800 each
"Add 3 more target pages"	New work	5	3,500
"Pay for links on these big news sites"	Pass-through cost + approval	2	1,400 + fees
"Get us to page 1 for 'sofa covers'"	Not a deliverable: no ranking guarantees	—	—
"Link on site X got removed after 3 weeks"	Warranty replacement	2	0
"Can you do a technical SEO audit?"	Explicit exclusion	10	7,000

11. Video Editing: YouTube long-form episodes

Engagement: a finance creator needs 4 YouTube episodes edited from raw footage. Budget is 40 hours × ₹900 = **₹36,000** for the month.

#	Deliverable	Specification	Hours
1	Episode edits	4 episodes, 12–15 min final each, from up to 60 min raw footage per episode	24
2	Captions and on-screen text	Burned-in key-point titles, up to 10 per episode; English SRT file	6
3	B-roll and graphics	Stock B-roll and simple chart callouts from a fixed template	4
4	Audio	Noise reduction, levelling to −14 LUFS, licensed background music	3
5	Thumbnails	1 thumbnail per episode, 1280×720 px, 1 variant	3
	Total	4 episodes	**40**

Included

- Editing in Premiere Pro or DaVinci Resolve; project files on request
- 2 revision rounds per episode, feedback as timestamped notes
- Stock music and B-roll from the studio's licence

Excluded

- Shooting, scripting, voiceover recording
- Hindi or regional subtitles
- Custom motion graphics or animation beyond the template
- YouTube Shorts or reels cut from the episodes
- Uploading, SEO titles, descriptions, channel management
- Colour grading beyond basic correction

Revisions and acceptance

- Feedback must reference timestamps; general comments like "tighten it" count as a full round
- Episode accepted on written approval or after 3 working days without feedback

Client responsibilities and assumptions

- Raw footage uploaded to a shared drive by Monday of each week
- Script or outline provided with each episode so cuts follow the intended story
- One approver: the creator

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Cut 3 Shorts from each episode"	Explicit exclusion	6	5,400
"Add Hindi subtitles"	Explicit exclusion	4	3,600
"Raw footage for episode 3 is 2 hours, not 60 min"	Scope overrun	4	3,600
"Music in episode 2 got a copyright claim"	Defect (studio licence error)	1	0
"Make it more engaging like MrBeast"	Unclear: ask for specific references and pacing	—	—
"Third revision round on episode 1"	Beyond included revisions	2	1,800

12. Video Production: 60-second brand film

Engagement: a restaurant chain needs a 60-second brand film for Instagram and YouTube ads. Budget is **₹1,40,000**: 70 studio hours × ₹1,200 (₹84,000) + 1 shoot day of crew and equipment (₹56,000), over 4 weeks.

#	Deliverable	Specification	Hours / cost
1	Concept and script	2 concepts, 1 chosen, script up to 120 words	10 h
2	Pre-production	Shot list, storyboard (12 frames), location recce at 1 outlet	12 h
3	Shoot day	1 day (8 hours) at 1 outlet: director, DOP, 1 assistant, camera, lights, sound	₹56,000
4	Edit	60 s master film (16:9)	24 h
5	Cutdowns	30 s and 15 s versions; 9:16 vertical version of the 60 s	10 h
6	Finishing	Colour grade, licensed music, sound mix, end card with logo	12 h
7	Delivery	MP4 (H.264) in all versions + 1 subtitle file	2 h

#	Deliverable	Specification	Hours / cost
	Total		**70 h + ₹56,000**

Included

- Up to 3 restaurant staff appearing on camera (client arranges consent)
- 2 revision rounds on the edit
- Licensed stock music; client may use the film in paid ads for 2 years

Excluded

- Professional actors, models, influencers, food stylists
- Additional shoot days, locations or reshoots for client reasons
- Voiceover artist, drone footage, 3D or animation
- Location permits and fees; travel outside the city
- Media buying or posting
- Raw footage handover (available as a paid add-on)

Revisions and acceptance

- Script is locked before the shoot; script changes after the shoot can only use footage already shot
- Weather or outlet closure on the shoot day: 1 free reschedule

Client responsibilities and assumptions

- Outlet available for 8 hours on the shoot day, with dishes prepared to the shot list
- One approver: the marketing head (founder approval must be routed through them)

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Can we shoot at our second outlet too?"	Explicit exclusion (extra day)	8 h + crew	9,600 + 56,000
"Add a voiceover in Telugu"	Explicit exclusion	4 h + artist fee	4,800 + fee
"Make a 6-second bumper ad"	New work	3	3,600
"Founder wants a new script after the shoot"	Conflicting approval: needs reshoot	—	Re-estimate

Client request	Classification	Est. hours	Price (₹)
"Colour looks different on the 9:16 version"	Defect (studio export)	1	0
"Send us all the raw footage"	Paid add-on	2	2,400

13. Video Services: monthly social reels retainer

Engagement: a fitness studio wants a monthly reels package. Budget is 36 hours × ₹900 = **₹32,400 per month**, on a 3-month minimum.

#	Deliverable (per month)	Specification	Hours
1	Content plan	12 reel ideas with hooks, approved in week 1	3
2	Reels	12 reels, 15–45 s, 9:16, from client-shot phone footage	24
3	Captions	Burned-in English captions + on-screen hook text	4
4	Covers	12 cover frames matching the grid style	3
5	Monthly review	30-minute call + views/saves summary from client's Insights screenshots	2
	Total per month	12 reels	**36**

Included

- Trending audio suggestions (client posts with in-app audio)
- 1 revision round per reel
- Unused hours do not roll over; unused reels do not carry to next month

Excluded

- Filming or on-site shoots
- Posting, scheduling, community management, replying to comments
- Paid ad versions (different aspect ratios, ad copy)
- YouTube long-form or podcast editing
- Influencer sourcing
- Guaranteed views, followers or leads

Revisions and acceptance

- Reels approved within 2 working days; unapproved reels count as delivered after 3 days
- Ideas changed after week 1 approval count as new reels

Client responsibilities and assumptions

- Footage uploaded weekly; at least 5 usable clips per reel
- One approver: the studio owner

Change request bank

Client request	Classification	Est. hours	Price (₹)
"4 extra reels this month for our anniversary"	New work	8	7,200
"Can you also post them and reply to comments?"	Explicit exclusion	10 per month	9,000 per month
"Come shoot at the studio for a day"	Explicit exclusion	8 + travel	7,200 + travel
"Reel 7 has a spelling mistake in the caption"	Defect (studio error)	0.25	0
"Our footage this week is too dark to use"	Client-side issue: reels move to next week	—	—
"Make reels that go viral"	Unclear: no guaranteed outcomes; ask for target format	—	—

14. After Effects: motion graphics pack for a product launch

Engagement: a fintech app needs launch motion graphics. Budget is 40 hours × ₹1,200 = **₹48,000** over 3 weeks.

#	Deliverable	Specification	Hours
1	Style frames	3 still frames showing the motion style; 1 chosen	6
2	Logo animation	3–5 s logo reveal with sound effect	6
3	Feature promo	30 s, 16:9, animating 4 app screens supplied by the client	16

#	Deliverable	Specification	Hours
4	Social versions	9:16 and 1:1 versions of the promo	6
5	Lower thirds	1 lower-third template for the client's own videos (MOGRT)	3
6	Revisions and render	2 rounds; MP4 + transparent MOV for logo; AE project files	3
	Total		**40**

Included

- Licensed music and sound effects from the studio's library
- Animation of client-supplied UI screens and icons (no UI redesign)

Excluded

- Script writing and voiceover
- Character animation, 3D elements
- UI or screen design
- Additional durations, languages or aspect ratios
- Lottie/JSON exports for the app

Revisions and acceptance

- The motion style is locked after style frames are approved
- Animatic (timing draft) approval is required before final animation; timing changes after this point are change requests

Client responsibilities and assumptions

- Final app screens as layered Figma or AI files by day 2
- One approver: the brand lead

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Make a 15 s version too"	New work	4	4,800
"Export the logo animation as Lottie for the app"	Explicit exclusion	4	4,800
"We redesigned 2 screens, please swap them"	Change to client inputs	5	6,000

Client request	Classification	Est. hours	Price (₹)
"Add a 3D phone mockup rotating"	Explicit exclusion	10	12,000
"The logo is slightly off-centre in the final render"	Defect (studio error)	0.5	0
"Can it feel more premium?"	Unclear: ask for 2–3 reference videos	—	—

15. Animation: 90-second 2D explainer video

Engagement: an insurance startup needs an explainer for its website homepage. Budget is 70 hours × ₹1,200 = **₹84,000** over 5 weeks.

#	Deliverable	Specification	Hours
1	Script	Up to 220 words (about 90 s), 2 drafts	6
2	Storyboard	15–18 frames with action notes	10
3	Character and scene design	2 characters, 5 backgrounds, flat 2D style	14
4	Voiceover	1 professional English voice (Indian accent), 1 pickup session	4 + artist fee included
5	Animatic	Timed storyboard with voiceover	6
6	Animation	90 s full 2D animation	24
7	Sound and delivery	Music, sound effects, mix; MP4 1080p 16:9 + English SRT	6
	Total		**70**

Included

- 2 revision rounds at each stage: script, storyboard, design, animation
- Voice artist fee for 1 English voiceover, website and social use

Excluded

- Additional languages or voiceovers
- Additional characters or scenes beyond the storyboard
- 3D animation, live-action footage

- Vertical or square versions, cutdowns
- TV or cinema broadcast licences for music and voice

Revisions and acceptance

- Each stage is locked on approval; changes to a locked stage are change requests
- Script change after voiceover recording requires a paid re-record

Client responsibilities and assumptions

- Product facts and claims are verified by the client's compliance team before script lock
- One approver: the marketing head; compliance sign-off is collected by the client

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add a Hindi version"	Explicit exclusion	10 + artist fee	12,000 + fee
"Make a 30 s cutdown for ads"	Explicit exclusion	6	7,200
"Compliance changed 2 lines after VO recording"	Change to locked stage	4 + re-record fee	4,800 + fee
"Add a third character, the agent"	New work	8	9,600
"Character's hand disappears for 2 frames at 0:43"	Defect (studio error)	1	0
"Marketing approved the storyboard, but the CEO rejected it"	Conflicting approvals: named approver decides; escalate	—	—

16. 3D Modelling: furniture product models for e-commerce

Engagement: a furniture brand needs 3D models for its website's 360° viewer. Budget is 50 hours × ₹1,300 = **₹65,000** over 3 weeks.

#	Deliverable	Specification	Hours
1	Reference review	Check dimensions, photos and material swatches per product	3

#	Deliverable	Specification	Hours
2	Models	5 products (sofa, armchair, coffee table, bed, wardrobe), real-world scale, ±5 mm accuracy	30
3	Textures (PBR)	2 fabric/finish variants per product, 2K textures	10
4	Web optimisation	GLB under 5 MB per model, under 50k polygons	4
5	Delivery and QA	GLB + FBX + OBJ; preview check in a web viewer	3
	Total	5 products × 2 variants	**50**

Included

- 2 revision rounds per model on shape and material
- Models delivered with clean naming and pivot points at floor centre

Excluded

- Photoreal renders or lifestyle scenes (see 3D Rendering SOW)
- AR app development or 3D viewer integration on the website
- Animation (opening drawers, unfolding sofa beds)
- Variants beyond 2 per product
- Modelling from photos only, with no dimension sheet

Revisions and acceptance

- Model accepted when dimensions match the spec sheet within ±5 mm and materials match swatch photos
- Changes to the physical product design after approval are new work

Client responsibilities and assumptions

- Dimension drawings, 6-angle photos and fabric swatch photos for each product by day 2
- One approver: the e-commerce manager

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add 4 more fabric colours to the sofa"	New work	4	5,200
"Add 3 more products"	New work	20	26,000

Client request	Classification	Est. hours	Price (₹)
"Make the wardrobe doors open in the viewer"	Explicit exclusion (animation)	6	7,800
"Sofa is 40 mm shorter than the spec sheet"	Defect (studio error)	1	0
"We changed the bed's headboard design"	Change to client input	5	6,500
"Put the models on our website with AR"	Explicit exclusion	Re-estimate	—

17. 3D Rendering: architectural interior visualisation

Engagement: a real-estate developer needs photoreal renders of a 3BHK sample flat for its sales brochure. Budget is 56 hours × ₹1,300 = **₹72,800** over 3 weeks.

#	Deliverable	Specification	Hours
1	Scene setup	Model the flat from client's AutoCAD plan: walls, doors, windows, ceiling	12
2	Furnishing	Furniture and décor from the studio's library, per a client-approved moodboard	10
3	Clay renders	6 greyscale camera views for angle approval	4
4	Final renders	6 photoreal stills: living, dining, kitchen, master bedroom, bedroom 2, balcony	24
5	Post-production	Colour, lighting balance and sky replacement in Photoshop	4
6	Delivery	4K JPG (3840×2160) + print TIFF at 300 dpi for A4	2
	Total	6 views, daylight	**56**

Included

- 2 revision rounds on materials and lighting after clay approval
- Daylight lighting only

Excluded

- Night or dusk versions

- Exterior building renders, aerial views
- 360° panoramas, VR or walkthrough animation
- Custom-modelled bespoke furniture (library items only)
- Changes to the floor plan after scene setup
- Brochure layout design

Revisions and acceptance

- Camera angles are locked on clay render approval; new angles after this are new renders
- Final renders accepted on written approval or after 3 working days without feedback

Client responsibilities and assumptions

- Final AutoCAD plan with elevations and a material specification list by day 1
- One approver: the developer's marketing manager

Change request bank

Client request	Classification	Est. hours	Price (₹)
"Add night versions of all 6 views"	Explicit exclusion	12	15,600
"Add 2 more views: kids' room and foyer"	New work	9	11,700
"Make a 60 s walkthrough video"	Explicit exclusion	30	39,000
"Architect moved the kitchen wall"	Plan change after setup	6	7,800
"Kitchen counter is grey; the spec sheet says white marble"	Defect (studio error)	2	0
"Brochure goes to print in 3 days, need everything now"	Rush: capacity check, 1.5× on remaining hours	—	—

Demo test bank: one request per case check

These 8 requests from the SOWs above cover every scored check and edge case in the C35 brief. Run them live in the demo and as automated tests.

Case check or edge case	SOW	Request	Expected system result
₹6,000 estimate (10 pts)	6. eCommerce	"Add 6 more hours of homepage customisation"	6 h × ₹1,000 = ₹6,000 before tax; GST shown on a separate line
Rejected ≠ committed (10 pts)	1. Graphic Design	"Add 4 more Instagram posts", client rejects the quote	Status Rejected; 0 hours booked; capacity unchanged
No double charge (5 pts)	6. eCommerce	Same request imported from email and WhatsApp	Second import flagged duplicate; 1 estimate, 1 booking
Unclear request	1. Graphic Design	"Make it pop more"	Status Needs clarification; questions generated; no price
Urgent deadline	1. Graphic Design	"3 extra posts by tomorrow morning"	3 h × 1.5 = 4.5 h, ₹6,750; capacity check runs first
Rework due to own defect	2. Logo Design	"HEX code doesn't match the logo file"	Defect: ₹0 billable; 0.5 h deducted from capacity
Conflicting approvals	15. Animation	Marketing approves, CEO rejects	Only the named approver counts; conflict flagged for escalation
Capacity exceeded	17. 3D Rendering	"Need everything in 3 days"	No auto-quote; shows shortfall in hours and a later date

Demo flow suggestion: start with the eCommerce SOW for the scored checks, then switch to the design SOWs to show the edge cases. Using several profiles shows the tool works across job types, not just one fixture.
